GRADE RANGES

The grade ranges listed for the videos are just a general guideline. If you are interested in using a video in your classroom, we would recommend that you preview it first to decide if it is appropriate for your classroom. We encourage you to never show a video that you have not previewed yourself! Remember, just because a video grade range doesn't include your particular grade, your students might still be able to benefit from it. No one knows your classroom and your students better than you do—the best judge of what is right for your class is YOU!
